## N.8 - infoFACTORY

### DESCRIPTION

infoFACTORY is the first ICT spin-off of the University of Udine. It originates from the Artificial Intelligence Laboratory of the Department of Computer Science, which was started by prof. Carlo Tasso in 1984. In the Laboratory many R&D projects were carried out, in the field of Web information filtering, knowledge management and adaptive personalization. infoFACTORY started operation in 2005.

Basic services provided by infoFACTORY are 'automatic press review', 'Web monitoring and filtering', which are supported by the proprietary semantic technologies developed within the Artificial Intelligence Laboratory.

Lately, the focused has switched on Social Media, Open Innovation, Web 2.0 and Web 3.0. Following the enormous growth of Web 2.0 and of UCGs (User Generated Contents), infoFACTORY has developed innovative services for Reputation Management and Marketing & Competitive Intelligence. The services are supported by a specific methodology for designing appropriate KPI's (Key Performance Indicators) and by innovative software tools for sentiment analysis, information extraction, and automatic tagging.

### KEY WORDS

- Word of mouth measurement
- Online reputation management
- Web monitoring and filtering
- Customized Web information extraction
- Strategic support for Social Media
- Web applications and portals

# N.16 – Siemens Healthcare

## DESCRIPTION

The Healthcare division of Siemens is investigation in medical imaging & IT as well as workflow solutions. The Imaging & IT Division provides imaging systems for early diagnosis and intervention, as well as for more effective prevention. These systems are networked with high-performance healthcare IT to optimize care processes. Workflow & Solutions provides complete solutions for fields such as cardiology and oncology (including conventional radiation systems and particle therapy) and neurology. The Division also offers solutions for women's health (mammography), urology, surgery and audiology. The subsidiary of Siemens Healthcare in Graz is also focusing on the digitalization of the distribution of medical images and reports between radiological institutes and assigning physicians. The main focus on the development of the IT project "Teleimage" was on a security concept in accordance with Austrian laws.

# N.17 – Studio ARCHIMEDE Sas

## DESCRIPTION

Studio ARCHIMEDE is a company constituted in 1993 with the aim of realizing specific data processing solutions for various sectors, such as manufacturing companies and public administrations. The company can claim fifteen years of intense activity and the realization of many projects on data base for companies dealing with commerce, services, craftsmanship, large, medium and small-sized industries and municipal administrations, which have all contributed to enriching our experience and professionalism. The software "MACHINA", whose first release dates back to 1995, is surely one of the simplest and most complete systems for the MANAGEMENT OF MAINTENANCE that has ever been produced. "MACHINA" is an innovative programme for the management of the maintenance of machines and plants, which can easily be installed in companies of any size and dimension. Mr Francesco Montanari is the reference person of our company, both for commercial relationships and for the technical part.
